1 CME Hour

## Augmented reality in the OR, improving surgery and outcomes

This presentation will talk about the role of technology including 3D models, and augmented reality in the OR and surgical technique education and how these can help improve surgery efficiency and patient outcomes. This talk will be 1 hour.

Dr. Wong is a professor at Dalhousie University, specializing in sports and trauma surgery, including arthroscopic reconstruction of shoulder, hip, and knee. He is the director of Dalhousie Joint Preservation, Sports Medicine, and Arthroscopy Fellowship Program and Dalhousie Sports Medicine Research, the president of Arthroscopy Association of Canada (AAC), the Membership Committee Chair of Arthroscopy Association of North America (AANA), the Member-at-Large in AANA Board of Directors, fellow of AANA (FAANA), and an editorial board member of American Journal of Sports Medicine (AJSM) and Arthroscopy - Journal of Arthroscopic and Related Surgery (ARTH).
